

Roman Noris

Senior Fullstack Developer

Email: noris@example.com | GitHub: github.com/noris | Portfolio: roman-noris.dev

Professional Summary

Visionary Fullstack Developer with deep expertise in modern web architectures. Specialized in engineering high-performance, visually stunning applications that push the boundaries of user experience. Proficient in scaling systems from database architecture to complex 3D frontend interfaces.

Technical Arsenal

Frontend: React, Next.js, Three.js, GSAP, Tailwind CSS, Framer Motion

Backend: Node.js, NestJS, Express, Python, Go

Databases: PostgreSQL, MongoDB, Redis, MySQL, Prisma

Tools & DevOps: Docker, Kubernetes, AWS, PDFKit, Puppeteer, CI/CD

Professional Experience

Senior Fullstack Developer | Antigravity Engineering

[2023 - Present]

- Architected a Next.js 14 and NestJS monorepo serving 100k+ MAU.
- Engineered complex 3D WebGL interfaces using React Three Fiber.
- Implemented automated PDF generation pipelines utilizing PDFKit and Headless Chrome.

Fullstack Engineer | Tech Solutions Inc.

[2020 - 2023]

- Developed blazing fast REST and GraphQL APIs using Node.js and PostgreSQL.
- Migrated legacy React SPA to Next.js App Router, boosting SEO and decreasing initial load times by 40%.
- Set up robust CI/CD pipelines utilizing GitHub Actions and Docker containers.

Education

B.S. in Computer Science | University of Technology
